Profile

Passionate Full Stack Developer with over 2 years of experience in building and testing robust applications using diverse technologies. Seeking to leverage my skills in a reputable organization to drive growth and innovation.

Professional Experience

Silicon Valley Bank, Bangalore

Software Engineer, August 2022 - Present

Project #1: Shared Loss Agreement Platform

- Developed REST APIs using the **Spring Boot** framework, utilizing **Maven** as the build tool, and conducted thorough testing of APIs with **Postman**.
- Experienced in application development with **Spring Batch, Spring Security, SFTP, Collections, and Hibernate ORM**, demonstrating effective use of these technologies.
- Worked with **Red Hat OpenShift Containers**, facilitating container orchestration and management.
- Proficient in database management, with experience in **PostgreSQL** and **MySQL** platforms.
- Experienced in working with message brokers like **Active MQ**
- Writing unit tests using **JUnit and Mockito**.
- Proficient in object-oriented programming principles, including inheritance, encapsulation, and polymorphism, which form the foundation for design patterns.
- Developed user interfaces using **React.js, HTML, CSS, Bootstrap, and Axios**, ensuring responsive and user-friendly designs.
- Implemented form validation, error handling, and event handling using **JavaScript and jQuery** to enhance user experience.
- Skilled in **Redux**, proficiently managing React application states to optimize data flow and enhance user interactions.
- Participated in **Agile methodology**, actively engaging in daily Scrum meetings to promote collaboration and continuous improvement.
- Strong knowledge of **version control tools**, including **GitLab**, and experienced with ticket tracking platforms such as **JIRA**.
- Contributed to the creation and development of Technical Design Documentation (TDD) to outline system architecture and specifications.

Project #2: Finance Connect

Web application for budget and approval management

- Developed the user interface using **React.js, Bootstrap and JQuery** to facilitate budget creation, manage multiple initiatives, allocate resources and costs, assign roles, and track the status of budget requests.
- Integrated **Tableau** dashboards into the application to visually display generated reports.
- Utilized **Redux for state management**, effectively storing user session information and global data.
- Familiar with cloud technologies, particularly Amazon Web Services (AWS), to enhance application deployment and scalability.

Education

Bachelor of Information Technology

Madras Institute of Technology, Anna University
CGPA: 8.34

2018 – 2022
Chennai, India

Class - XII

Bharathi Matric Hr Sec School.
Percentage: 95.75

2016 – 2018
Bhuvanagiri, India

Technical Expertise

Skills:

Java, HTML, CSS, Bootstrap, Javascript, SQL, C++, C.

Frameworks / Tools / Libraries:

Spring boot, Spring Batch, Spring Security, React.js, Redux, JQuery, Axios, Gitlab, Postman, Postgres PgAdmin, Splunk.

IDE: IntelliJ / Eclipse / Netbeans / VS Code

Achievements and Certifications

AWS Certified Cloud Practitioner

- First-Class certification in English Typewriting (Higher level).
- 4-year scholarship recipient from Cognizant for academic excellence.
- Recognized by SVB for contributions to the Shared Loss Agreement Platform.

Languages Known

English - Professional working proficiency

Tamil - Native Proficiency
